

## Mark Anthony as Prince

### SOLO Backing Track Performance Technical Rider

#### SOUND

- well-sized PA system with mixing desk.
- Sennheiser wireless microphone (with quick release mic clip).
- IEM system
- input cable for backing tracks: mini jack cable for an iPod or digital device.

#### Sound Effects

We would be happy for a variety of sound effects on the vocal (example tracks: *Purple Rain, When Doves Cry, Kiss*). Our trust and respect is in the hands of the sound-man.

#### LIGHTING

Lighting can be discussed during sound-check.

- We need strong lighting colours (purple, yellow, orange, blue).
- A dry ice machine is preferred; if unavailable, a fog machine can be used instead (please use a small amount of fog for mood lighting).
- Single blinder spot light (if possible, mount a single blinder spotlight at ground level from the rear to cast a silhouette through the fog).

#### STAGE SURFACE

The stage surface must be **clear of dirt, cables and all obstacles before the show**. For safety reasons, a **wooden surface** is preferred.

## REQUIRED STAGE EQUIPMENT

- SENNHEISER wireless microphone (with quick release mic clip)
- round based microphone stand (Atlas ms20)

- At least 2 monitor wedges on either side of the microphone stand. Alternatively, an in-ear monitor (IEM) system.

We will need a **quick-change area** set up at the side of the stage wing. Please ensure it is easily accessible for quick costume changes during the performance.

## SOUNDCHECK

We would like 1 hour for sound-check including additional setup time.

## **BACKSTAGE DRESSING ROOMS**

- Dressing room with lockable door. Dressing rooms should be large enough to warm up and get some rest before the show.
- large mirror with good lighting
- toilet and a sink in the dressing room
- tables and chairs
- sofa
